Get Started

Thank you for purchasing our environment pack!

This asset has been designed to be used with **Unity 6** and the **Universal Render Pipeline**.
To avoid any rendering or shader issues (like pink objects), please make sure your project is setup in **Unity 6 or higher** and has been created using the **Universal 3D** template in Unity Hub.
Other than that, the asset should work out of the box after being imported from the package manager.

If you like the package, please take a minute and give us a rating in the Asset Store. This really helps us to create and improve our assets. If you encounter any problems, errors, or have a question do not hesitate to contact us via email: support@ilumisoft.de
